

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE  
Transcriber's Office

April 26, 1999 LB 630

areas are heavily in crop share, and I could compound the situation here by going into the differences in crop shares. There's all kinds of different crop shares from 20 to 80 percent, or 20-80 to 80-20, 30-70, 50-50, 40-60, 60-40, 50-50 on livestock and a different one on machinery. There's all kinds of different concepts. I didn't want to get into that on the floor. I think that this committee could work on those, and if you want to have...be sure, be assured that next year you'll have final discussion on this before any money is spent, because there is no money spent in this bill at this point except for the ag committee getting...getting set up and into place. And it doesn't go into effect for a year and a half or nearly a year and a half now, a little over a year, or a year and a half, as 2001, and I...I do recognize there is some difficulties in polishing this up and that's the reason I decided to have them do the rules and regs and then hopefully we would have a better idea on the fiscal note coming up this next...this next session. And if that would help, I'm certainly willing to discuss any wording that would help you along that line. I will emphasize, I may have misspoke earlier, LB 630 is the bill in the shape that I want it in. The amendment strictly is Senator Wickersham's. I support the bill as it is presently constituted and am opposing Wickersham's amendment. Thank you.

PRESIDENT MAURSTAD: Thank you, Senator Wehrbein. Senator Jones, on the Wickersham amendment.

SENATOR JONES: Mr. Chairman and members of the body, I am going to stand to oppose Wickersham's amendment right now because this cash rent is serious because I just had a ranch adjoining me, and Farmers National has got it, and they're asking \$100 an acre for the irrigated ground, which is only 100 acres, and then there's some dryland about \$40 an acre and the pasture is \$20 an acre. That little place is just a little over 2,000 acres and they're wanting over \$60,000 for that just in cash rent one year. And you take that for three years, you're getting up there over half...a quarter of a million dollars. So it's a lot of money for a young person to dig up. Some way or another we've got to get some incentives for the young farmer on this side of this, if it's going to be called a young farmer bill. So I guess I need to ask Wickersham, I mean Wehrbein, Senator Wehrbein a question.
